The RMI does not provide a specific country of origin of the conflict minerals processed by conformant smelters. Due to business confidentiality reasons, the country of origin data is provided in an aggregated way based on country risk level. Thus, we were not able to determine with certainty the specific countries of origin of the conflict minerals processed by the listed conformant smelters. The list is the possible countries the material may have come from and references the plausible list of mineral mine production by country (RMI report published March 2020, Mineral Mine Production Country”). The list is based on the country of origin data provided by the RMI for RMAP LBMA, and RJC conformant smelters only. To supplement this list, Google conducts independent due diligence into all identified smelters. On a continuous basis, Google requests its suppliers to cease doing business with non-conformant smelters

and notifies suppliers that non-conformant smelters are no longer approved to be in Google's supply chain.
